

DT04 Rec'd PC7/PTO 08 JUL 2004

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) An adhesive tape attaching jig which is an attaching jig for continuous attachment of adhesive tape in a manner conforming to the shape and/or size of a long object, said jig comprising the combination of

a tape holder which receives and holds ~~said~~ the adhesive tape in said attaching jig;

a tape attacher which contact bonds the adhesive tape that has been guided from said tape holder onto the tape attachment surface of the object; and

a jig guide member which continuously guides said attaching jig along the object,

~~wherein said jig is characterized by said tape holder comprising an adjustable mechanism for matching the width of the adhesive tape or object, said tape attacher comprising an adjustable mechanism for matching the width of the adhesive tape or object, and said jig guide member each comprise comprising an adjustable mechanism for adjusting the space between said jig guide member and said tape attacher.~~

2. (Currently Amended) An adhesive tape attaching jig according to claim 1, ~~characterized in that~~ wherein said adjustable mechanism of said tape holder and said adjustable mechanism of said tape attacher are the same mechanism.

3. (Currently Amended) An adhesive tape attaching jig according to claim 1 ~~or 2~~, ~~characterized in that~~ wherein said tape attacher also has an adjustable mechanism which allows adjustment of the positional relationship between said tape attacher and the object.

4. (Currently Amended) An adhesive tape attaching jig according to ~~any one of claims 1 to 3, characterized in that~~ claim 1, wherein each said adjustable mechanism consists of a slide mechanism provided with energizing means.

5. (Currently Amended) An adhesive tape attaching jig according to ~~any one of claims 1 to 4, characterized in that~~ claim 1, wherein said tape attacher has at least one attachment head comprising a cylindrical member.

6. (Currently Amended) An adhesive tape attaching jig according to ~~any one of claims 1 to 5, characterized in that~~ claim 1, wherein said attaching jig is suitable for the attachment of adhesive tape in a manner conforming to the shape and/or size of a long object extending in the longitudinal direction and having a varying shape and/or size on the tape attachment surface along its length.

7. (Currently Amended) An adhesive tape attaching jig according to ~~any one of claims 1 to 6, characterized in that~~ claim 1, wherein said attaching jig is suitable for attaching an adhesive tape for an automobile sash frame or the like.

8. (New) An adhesive tape attaching jig according to claim 1, wherein said tape holder comprises an adjustable mechanism for matching the width of the adhesive tape or object.

9. (New) An adhesive tape attaching jig according to claim 1, wherein said tape attacher comprises an adjustable mechanism for matching the width of the adhesive tape or object.

10. (New) An adhesive tape attaching jig according to claim 1, wherein said jig guide member comprises an adjustable mechanism for adjusting the space between said jig guide member and said tape attacher.

11. (New) An adhesive tape attaching jig according to claim 2, wherein said tape attacher also has an adjustable mechanism which allows adjustment of the positional relationship between said tape attacher and the object.

12. (New) An adhesive tape attaching jig according to claim 2, wherein each said adjustable mechanism consists of a slide mechanism provided with energizing means.

13. (New) An adhesive tape attaching jig according to claim 3, wherein each said adjustable mechanism consists of a slide mechanism provided with energizing means.

14. (New) An adhesive tape attaching jig according to claim 2, wherein said tape attacher has at least one attachment head comprising a cylindrical member.

15. (New) An adhesive tape attaching jig according to claim 3, wherein said tape attacher has at least one attachment head comprising a cylindrical member.

16. (New) An adhesive tape attaching jig according to claim 4, wherein said tape attacher has at least one attachment head comprising a cylindrical member.

17. (New) An adhesive tape attaching jig according to claim 2, wherein said attaching jig is suitable for the attachment of adhesive tape in a manner conforming to the shape and/or size of a long object extending in the longitudinal direction and having a varying shape and/or size on the tape attachment surface along its length.

18. (New) An adhesive tape attaching jig according to claim 3, wherein said attaching jig is suitable for the attachment of adhesive tape in a manner conforming to the shape and/or size of a long object extending in the longitudinal direction and having a varying shape and/or size on the tape attachment surface along its length.

19. (New) An adhesive tape attaching jig according to claim 4, wherein said attaching jig is suitable for the attachment of adhesive tape in a manner conforming to the shape and/or size of a long object extending in the longitudinal direction and having a varying shape and/or size on the tape attachment surface along its length.

20. (New) An adhesive tape attaching jig according to claim 5, wherein said attaching jig is suitable for the attachment of adhesive tape in a manner conforming to the shape and/or

size of a long object extending in the longitudinal direction and having a varying shape and/or size on the tape attachment surface along its length.

21. (New) An adhesive tape attaching jig according to claim 2, wherein said attaching jig is suitable for attaching an adhesive tape for an automobile sash frame or the like.

22. (New) An adhesive tape attaching jig according to claim 3, wherein said attaching jig is suitable for attaching an adhesive tape for an automobile sash frame or the like.

23. (New) An adhesive tape attaching jig according to claim 4, wherein said attaching jig is suitable for attaching an adhesive tape for an automobile sash frame or the like.

24. (New) An adhesive tape attaching jig according to claim 6, wherein said attaching jig is suitable for attaching an adhesive tape for an automobile sash frame or the like.
